

CrowdMaster™ Barricade Gates

CUSTOMER & EMERGENCY ACCESS

CrowdMaster gates provide access through a line of barricades. Attached using the same hook & loop system of the barricades, the gates have an easy open latch which will hold the gate securely when closed. Gates not only allow customer access but also provide emergency access for EMS and police and act as a safety feature in case rapid evacuation of the area is required. CrowdMaster gates come in two sizes 38"/1m which allows individual access and 79"/2m which allows volume access.
