

CrowdMaster™ 1000 Barricade

HEAVY DUTY CROWD CONTROL

These Barricades are built from heavy gauge steel and are hot-dipped galvanized inside and out for long-term weather resistance. Frames are made from 1.5"/38mm steel tubing, while uprights are made from 1/2"/13mm steel tubing. Uprights are fully inserted into the frame before welding, providing extraordinary strength. Choose from two base systems: a bridge base for uneven surfaces such as grass and a flat base for smooth surfaces such as tarmac and where pedestrian traffic demands the minimum trip hazard. The barricades interlock using the industry standard hook and half-loop fastening system.

Model BARR-FLAT

CHOICE OF TWO BASE STYLES

Bridge

Flat

Heavy Duty Feet
